

# AI Developer — Junior / Associate Level

---

<b>Position</b>	AI Developer (Junior / Associate)
<b>Company</b>	VT Outsourcing & VT Global
<b>Location</b>	Ahmedabad, India
<b>Job Type</b>	Full-Time
<b>Job Category</b>	Technology / AI & Automation
<b>Experience</b>	0 – 2 Years

## Position Overview

---

VT Outsourcing & VT Global is seeking a motivated and technically curious Junior AI Developer to join our growing technology team in Ahmedabad. This is an exciting opportunity for an early-career professional to work at the intersection of artificial intelligence, automation, and financial services.

You will contribute to the design, development, and deployment of AI-powered tools and automation workflows that support our Australian financial planning, accounting, and outsourcing operations. Working alongside experienced developers and business teams, you will gain hands-on experience building real-world solutions in the fintech and professional services space.

## Key Responsibilities

---

### AI & Automation Development

- Design, build, and maintain AI-powered automation workflows to streamline business processes across financial planning, accounting, and client services functions.
- Develop and integrate intelligent automation tools using platforms such as n8n, Zapier, Make (Integromat), or similar workflow automation frameworks.
- Build AI-assisted document processing solutions to automate the extraction, classification, and summarisation of financial documents such as SOAs, tax returns, and client reports.
- Create and maintain chatbots and virtual assistants to support internal teams and client-facing operations.
- Assist in the development and fine-tuning of large language model (LLM) prompts and pipelines for use in financial services contexts.

### Financial Services & Fintech AI

- Collaborate with accounting, financial planning, and mortgage teams to understand operational pain points and translate them into AI-driven solutions.
- Develop AI tools that assist with compliance checks, document validation, and data accuracy reviews aligned with Australian regulatory standards.
- Support the integration of AI capabilities into existing financial planning software ecosystems (e.g., Xplan, AdviserLogic, Xero, MYOB).
- Research and apply emerging AI technologies and fintech trends relevant to Australian professional services firms.
- Assist in building dashboards and reporting tools that surface AI-generated insights to business stakeholders.

### Integration & Deployment

- Develop and maintain RESTful APIs and third-party integrations to connect AI tools with internal systems and external platforms.
- Assist with the deployment, monitoring, and ongoing maintenance of AI models and automation pipelines in production environments.
- Write clean, well-documented, and maintainable code following best practices and version control standards (Git).
- Participate in testing, debugging, and quality assurance of developed solutions prior to release.

### **Collaboration & Continuous Improvement**

- Work closely with cross-functional teams including operations, client services, and compliance to identify and prioritise automation opportunities.
- Document technical processes, workflow designs, and system configurations to support knowledge sharing and team scalability.
- Stay current with advancements in AI, machine learning, and automation technologies and proactively share learnings with the team.

## **Qualifications & Skills**

---

### **Essential**

- Bachelor's degree in Computer Science, Software Engineering, Information Technology, or a related field.
- 0 – 2 years of experience in AI, software development, or automation-related roles (including internships and academic projects).
- Proficiency in Python and familiarity with AI/ML libraries such as TensorFlow, PyTorch, scikit-learn, or HuggingFace Transformers.
- Understanding of REST APIs, JSON, and basic data structures for building integrations.
- Exposure to workflow automation tools such as n8n, Make, Zapier, or Microsoft Power Automate.
- Strong problem-solving skills with the ability to break down complex requirements into practical technical solutions.
- Good written and verbal English communication skills for cross-functional collaboration.

### **Desirable**

- Familiarity with large language models (LLMs) such as OpenAI GPT, Claude, or Google Gemini and experience with prompt engineering.
- Experience with cloud platforms such as AWS, Azure, or Google Cloud for AI model hosting and deployment.
- Knowledge of the Australian financial planning, accounting, or mortgage industry is a strong advantage.
- Experience with document intelligence tools such as Azure Document Intelligence, AWS Textract, or similar OCR platforms.
- Exposure to vector databases (e.g., Pinecone, Weaviate, Chroma) and retrieval-augmented generation (RAG) frameworks.
- Familiarity with version control (Git/GitHub) and agile development methodologies.

## **What We Offer**

---

- Competitive salary package based on skills and experience.
- A unique opportunity to apply AI and automation within the Australian financial services and professional outsourcing sector.
- Hands-on mentorship from experienced developers and industry professionals.
- Access to cutting-edge AI tools, platforms, and continuous learning resources.

- A collaborative, innovative team culture that values ideas and initiative.
- Clear career progression pathways into mid and senior AI/technology roles within VT Outsourcing & VT Global.
- Stable, full-time employment in a fast-growing and forward-thinking organisation.
